

Personal and Local Notes

Miss Lenora Craven is in Los Angeles visiting relatives.

Mrs. Frank Haffaker and children, of Bakersfield, visited at the Ely home this week.

Miss Lucile Thomason is spending the week at Camp Haldy as the guest of Miss Mildred Hale.

J. R. King was called to Santa Ana last week by the sudden death of his mother, Mrs. Sarah A. R. King.

Miss Elizabeth Delaway of Moorpark was a week-end visitor at the home of Mrs. L. P. Mitchell.

Miss Elsie Schneider, from Los Angeles, is spending the week with her father and mother, Mr. and Mrs. J. T. Hankin.

Rev. D. Babcock and wife of Pasadena, and Dr. A. J. Frost of Los Angeles, were guests of Mr. and Mrs. M. D. Hartough on Wednesday.

Mr. and Mrs. J. T. Holt of Owensmouth, and Mr. and Mrs. Harvey of Los Angeles, have just returned from a pleasant week in Los Feliz canon.

Dr. and Mrs. John Lewis of Reno, Nevada, visited Mr. C. P. Riddle and family, Wednesday last week. They were motoring from San Diego to San Francisco.

The library was the scene of a pleasant gathering of close-in ladies, at Thursday afternoon, when Miss Orpha Shultz gave an interesting address on the life of St. Elizabeth of the Juvenile Court, of which she is referee. She has charge of the children and young girls cases, and from her sincere motherly manner, fair-youth benignity, one feels that she considers these erring ones far more to be pitied than blamed. Dear, generous Miss Calloway served a wonderful cup of tea and sandwiches, and the ladies greeted Miss Shultz personally, wished her luck and promised to be here!

Mrs. Kellogg of Van Nuys gave a spirited talk, telling us what to do and why, which made the chances of the other seven candidates seem about as slim as a sugar ball these lean days.

The only political plan mentioned was when one suspicious dame asked to be made a policeman, having heard that the office is a very remunerative, if not an onerous one—in some localities.

Take the Owensmouth Gazette, only 10¢ per annum.

"It Will Be a Great Day For Politics"

and judicial administration when men of the high intellectual and moral qualifications of William J. Palmer and Harlan G. Palmer are available for politics in this state.—Dr. ROBERT L. D. HUNT, Professor of Economics, University of Southern California.

RECOMMENDED BY PROMINENT LEADERSHIP... WILLIAM J. PALMER... HARLAN G. PALMER... POLICE JUDGE... JUSTICE OF THE PEACE... OF LOS ANGELES... 'Put him on the job'...

RED CROSS BITS

Surgical dressings have been disconnected until some one will volunteer to bring out supplies and to carry back finished work. Will some one who has done that may these things volunteer. This will need a trip every two weeks. Many willing hands do the work, but it is too heavy to carry. The Red Cross gratefully acknowledges the carrying into Los Angeles a truck load of salvaged by Mr. Paulson. There is still another load to be taken in. Who will take it? A working man comes into the Red Cross every month and gives one-tenth of his wages earned.

Some time last Saturday evening the postoffice was broken into and it had been taken charge of by the postoffice officials of Los Angeles, and the investigation has brought to light petty thieving and pilfering that has been going on for some time, and there are others that will soon be brought to the notice of the authorities. The postmaster here takes this occasion to tell the owners of boxes to keep them locked, as there has been children opening and changing mail. It should be the duty of parents to know where their children are, and to make a clean town of Owensmouth.

NEW MARKET FOR CALIFORNIA GRAPE.

What may prove a death blow to the wine interests of California is the new plan being advocated by the viticulture department of the University of California to extract sugar from grapes. Not only will this new process revolutionize the existing industry of the state but the wine grape growers will have a new market for their product and their chief reason for opposing prohibition will lose its force. The Union Signal.

H. W. ALLEN PLUMBING, HEATING, AIR BRIGATORS' SUPPLIES

RED CROSS NOTICE An all-day meeting of Red Cross workers will be held on Tuesday at the library. Ladies are urged to bring their lunches.

THE BOYS IN KHAKI

The following is a letter received by Mr. Bechtelheimer from Dr. Lindsay, who is stationed at Camp Lewis, Washington: Camp Lewis, Aug. 15.

Dear Uncle Beck: Well, I notice that Uncle Sam is going to call in you old codgers up to 45. Better get ready.

If you are thinking of going in, you ought to go in for Y. M. C. A. work. You could do more good there than killing the Kaiser. If I could sing like you, nothing would please me better. The most popular fellow in the camp is the Y. M. C. A. song leader. He teaches the boys the songs they sing and the pep and spirit he gets out of the boys is wonderful. Would rather go to a song "sing" than a banquet any time. There are in all forms of activities to get the boys interested in.

It would just suit me if I were suited for the "Y" certainly deserves any support it can get. It furnishes moving pictures—entertainments of all kinds—writing paper, envelopes, has reading and game rooms. Allows the boy all the freedom that he is used to at home.

When I wear his hat, uniform, coat and make himself generally at home. My work consists of emergency work, vaccinations for smallpox and typhoid and paratyph. The combination of typh and paratyph is a danger. I sure sets you down hard. It must be the paratyph that does it. It makes the arm sore so that one goes thru the allergy to keep from having to ampute. It will make one feel "gritty." Wears it in a couple of days. You get three shots, one week apart. First is pretty bad—second is worst of all, and the third is not so bad—but good when its over.

When I first came we had about 25,000 men, then they were nearly all shipped to Korea, and left us about deserted, then the last draft gave us 12,000, and 10,000 more coming this month, so that we are beginning to look like big again. The paraflo drums is filled for eight hours a day. It is surprising the transformations in three weeks' time. Boys come in in civilian clothes, and in a couple of days are outfitted in uniforms and then get their guns.

From the day they land, however, they are out drilling, and by end of three weeks they march like regulars. Believe me, I am for universal training. The snap and discipline is almost unbelievable.

Fellows that never moved before in their lives, oh, boy, how they soon learn to jump when spoken to. They can save my kid whenever he gets the gun.

This is the largest camp in the U. S. Can accommodate 50,000 men. Expect to be placed in the new division which is being formed here. A division consists of about 37,000 men. It is made up of infantry, machine gun and artillery, light and heavy, with medical attachments.

We all are hoping to be a part and so over with it. It is to be 120. Do you think I a good cub? We have a lucky kid club, which has 100 members. We are beginning to ship boys every Thursday afternoon. We have two major leagues pitching, Dutch Reuther of Cincinnati, and one from New York. Jim Seest of the Cubs is captain. Babe Horton of "my" New York is first base.

Have seen had 1200 cows turned in on 'em. Some bunch, but funny. Singing all the time. About 50 per cent dressed though. Have seen killed by the way.

Inf. No. 8 161 Depot Brigade. Camp Lewis, Amer. Lake, Wash.

WE ALLIED AFFAIR

The Young People's class of the Community church has planned a most interesting evening of entertainment for the people of Owensmouth on Saturday, August 21st, at the home of Mrs. B.—, on West Sherman Way. They are arranging for a fair with books decorated to represent of the leading allied nations. Fancy work, ice cream, watermelon, popcorn and other articles will be on sale. Added to this a splendid program will be provided, which is sure to delight all who hear it.

Parking space has been secured for 250 machines and more ground can be acquired, if necessary. Pacific Electric cars will assist in carrying people to and from the grounds. The cars will leave Owensmouth at 6:40 and 9:20, and will return at 9:10 and 10:50. The show, however, has easily been secured, has been arranged to accommodate all who wish to visit the fair.

The non-pro people desire that their class should do its share in the present national crisis and have taken this means of doing so. The proceeds will be converted into War Savings Stamps. Let all who can, come out and help the young people.

At the Community Church—Sunday School, 19 a. m. Everything needed for intelligent Bible study.

At a preaching by Rev. G. D. Stewart of Los Angeles—a gifted young speaker. German youth church attendance is twenty years before, and then—the debt. Upworth League, T. p. m., for all young folks. Come.

The Owensmouth Bank Growers Association held a very interesting and well attended meeting Wednesday evening, Aug. 7, forty of the fifty members being present. Mr. Churchill of Oxenard, Association held a very interesting and well attended meeting Wednesday evening, Aug. 7, forty of the fifty members being present. Mr. Churchill of Oxenard, Association held a very interesting and well attended meeting Wednesday evening, Aug. 7, forty of the fifty members being present.

Mr. Hazard, a representative of the Food Administration will demonstrate the cooking of these beans. This should be a well attended meeting.

The Directors of the local Bean Growers Association met Monday afternoon and arrangements were made for handling the 64,000 bags bought thru this organization by the grower members.

G. P. Kelley tendered his resignation as secretary and R. L. Henderson, Asst. Cashier of the State Bank was chosen in his place.

FOR SALE—My beautiful Holly Springs Ranch, three miles south of Owensmouth. This ranch contains about 125 acres, and is an ideal place for beans or chickens. Or, it would be a fine place for a clubhouse or sanitarium. There is a fine mineral spring; the water has been analyzed and is highly recommended for stomach troubles. There is a five-room house, garage, barn, and haw house and an orchard containing about 1000 fruit trees. Fruit variety. Water is piped at once orchard and in the house; 55-barrel cistern; 30 acres can be cultivated. Will divide 50 acres. Doubtlessly there is oil under this land. Inquire at this office or see S. W. Paldor, Owensmouth, Calif. Mention ad.

NEW CROP BEANS CAN BE SOLD

The Marian Milling Company announced that it had secured from the Federal Food Commissioner for California, reading as follows: "The U. S. of Special License Regulations No. 31 does not prohibit the sale of beans from buying or selling, upon or after actual maturity, new crop dried beans that mature prior to September 1st."

The above will satisfy several growers. It shows that the most successful bean raised which fact will improve and advertise our valley almost more than any other crop raised judging by the history of other localities. It is not at all improbable that we shall in time, successfully raise the real Lima. Threshing has already commenced a little later than last year, but earlier than most any other section.

Mr. F. A. Orton will continue the management of the Owensmouth Bean Warehouse for the Vanorum Producers, August 15. The warehouse is now open for receiving and cleaning beans, of which there is a varied and ponderous crop. The Henderson Bros. is proving the most successful of bean raised which fact will improve and advertise our valley almost more than any other crop raised judging by the history of other localities. It is not at all improbable that we shall in time, successfully raise the real Lima. Threshing has already commenced a little later than most any other section.

FOR SALE—Rettinghouses and doled lands in Arizona. Irrigated and dry farms, cattle and sheep ranches. Cool summer, 4100 feet elevation; 160 acres of alfalfa, orange grove, fruit and shade trees, domestic water, good well, 2 1/2 hp. engine and 5 1/2 centrifugal pumps. Call on S. W. Paldor, estate, Price, \$15,000. Write Homer H. Hunt, care of this paper, and I will call on you.

G. W. West was called to Nebraska by the death of his mother. Mr. West had expected to leave shortly for Nebraska, but being unable to do so in California to make her home where he had word came.

HOMING INSTINCT OF TOADS

Like Pigeons, They May Yet Be Made Useful Strayers of Messages, Says Naturalist.

Armed may yet use toads as message bearers in place of carrier pigeons if this incident related in a letter to the editor of Every Week is found to have general application: "The toad is a naturalist and homing instinct of toads is well known. I have seen a toad in my garden in Wakefield for the last five years. On Tuesday, August 1st, I let the toad where it has always lived and he carried home, even though you have carried him to the city."

"I received, then, the toad to experiment with Teddy, the big toad, which has made me a toad in my garden in Wakefield for the last five years. On Tuesday, August 1st, I let the toad where it has always lived and he carried home, even though you have carried him to the city."

"I received, then, the toad to experiment with Teddy, the big toad, which has made me a toad in my garden in Wakefield for the last five years. On Tuesday, August 1st, I let the toad where it has always lived and he carried home, even though you have carried him to the city. At the corner of Franklin and Beverly streets, Charleston, near the R. and M. street tower where I live, I saw a toad, I let it go. It led me to the city. He blinked at the end of the second or so, darted out his tongue, swallowed a few Charleston moonshiners, and began straightway to hop along the side of the street. I saw my name was still left to his leg."

### BLIND CRITTERS

**A**L L MATTER would be composed of one solid, confused, conglomerate, dead mass without any order of arrangement among the particles if it were not for the sun's rays. We see sunshine and light rays but these are the destructive, not the constructive, the real, active, rays. Light is but the rays which rebound off from earthly objects.

The action and force is produced by magnetic rays which pass round and round between the particles of matter, using water and different forms of moisture as a medium to travel in or through. The magnetic rays cannot be seen because they go into matter but the light rays come outward; and, because you cannot see the magnetic rays you think they are not present, or, in action.

You may know that the force to run the electric railway cars comes through the wire cable a long distance from the power house where the electricity is manufactured. Then after the electricity has passed through the machinery of the car which takes the force out of it it is conducted into a rail or into the earth and it returns to the power house for a new supply of force.

When it comes from the power house it is pushed out, like a locomotive pushes a train of cars; but when it returns it is pulled into the power house like the locomotive pulls the train.

Now while the molecules stand end to end like the links in a chain the electrical waves travel along uninterrupted but when some of the links become turned sideways while others stand endwise it stops the waves of motion, or motor action so that life action stops and death and confusion sets in. The same as a chain could convey no power while the links were not in proper order without jerking and flopping and pushing other chains of matter out of regularity of action. Millions of these chains are required to be working in unity of action. Without unity in the molecules and cells life drags and becomes food for germs and carrion birds.

It is this low form of action of obstructed life that germs and birds search out for their special nutriment and engorgement. They are not able to live on life that is "first hand from nature." This is why MAN should eat such foods as to cause him to drink much water, as water is life first hand from nature.

As the magnetic rays from the sun approach the air and soil that is nearest to the surface of the earth they become confused and opposed by animal refuse and fats which disturbs the orderly condition of the molecules, or links, of the chains of matter in the blood and flesh of men. Confusion of the molecules makes confusion in ideas and confusion of ideas makes confusion of the works of the hands.

The leaders in this combat between flesh and reason use this confused condition among the masses to gain honor and distinction and lucrative advantage. In our most beautiful Democratic form of administration of justice the high officials are not classed great leaders but as great servants in which our present administration has, made exceedingly good.

We do not seek to amplify our material resources by aggression and murder but invite all fair-minded to come over and help us to apply justice and promote friendship and peace. But the light that produces peace to the intellect must go into the brain by the way of the food and blood; not the light that is perceived through the eyes.

The first step in our digestion is for the nutriment contained by the food to sink downward in the blood into the legs and have the force removed by those powerful leg muscles. Then the nutriment rises and continues to give out force to the more vital organs. By the time it has risen to the brain there is nothing remaining to the cell moisture but the films to the cells. It is these films of the cell water that produces the impressions for our correct understanding. Understanding is a healthy growth but these visions which come up before the eyes are false. The images are formed on screens of waste, or dross that floats in the air. Air is alive with germs. Air is nothing else besides germs and spores.

The motion or life of every cell except the red in germ, or animal, life. The red of red fruits or red honey is natural life, as the sun sends it to the earth. We must draw the natural life out from the materials which are dead and then by adding water and sun energy we shall become strong. Stronger than the material body can contain. By the accumulation of sun energy germ, or animal, energy is crowded to the surface and sent abroad on the air.

War is caused by the intrusion of the false light and the inability of combatants to take thought unto themselves. War is a combat between the elements contained in air and water.

C. W. DAYTON,  
The Honey Man

**The Quarrel.**  
Mrs. Willis—What did Mr. and Mrs. Pump quarrel about?  
Mrs. Gillis—Religion.  
Mrs. Willis—You don't say?  
Mrs. Gillis—Yes; she wanted to attend a church that has an unmarried preacher and he wanted to attend one that has a lot of pretty girls in the choir.—Jones.

**Medical Literature.**  
The London Lancet departs for a moment from the antique habits of refusing to adventure into the fields and gardens of literature, though keeping one foot safe within the accustomed medical precincts. The Lancet discusses nothing less worthy than the works, writings, theories, maxims and abstractions of Master Francois Babelais, the point being that his divergence into letters were simply part of his day's work as a practical medicine. He wrote, the Lancet assures us, not for the good generations of the future, not for the delictation of our own selves, but solely and strictly to amuse, divert and brace up the spirits of his patients during the tedious of their illness, thereby alding his cure and adding to his stature as a member of the faculty.

Master Francois was a great letterer in the therapeutic value of literature.

**The Lady or the Tiger?**  
"George," she said, "before I give you a final answer you must tell me something. Do you still say anything?"  
A smile of relief lighted his handsome countenance—was that all she wanted to know? Proudly, triumphantly he clasped her in his arms and whispered in her ear should he say:  
"Anything?"—George.

Notification has been received by the Southern California Edison Company that its application for an increase of its electric rates has been set for a hearing by the State Railroad Commission for August 19th, at the office of the Commission, in Los Angeles.

The application was filed in San Francisco on July 19th, and sets forth that the increased cost of operations incident to war conditions, has resulted in a corresponding increase in the cost of the generation and distribution of electricity, which renders an advance in rates necessary, in order that the Company may continue to render efficient service and perform its duty to the public.

Orders from the United States Fuel Administrator, H. A. Garfield, restricting the use of electricity for all unnecessary lighting, were received by the Southern California Edison Company on Monday, August 5th, and immediately put into effect. The instructions are subsequent to the general order of the President of the United States, authorizing the Fuel Administration to conserve in every possible way the use of fuel for war purposes.

As locally applied, the order designates Monday and Tuesday of each week for the restriction of public lighting in the cities, villages and towns to the amount necessary for safety. Candles or lights for the purpose of display or decoration are ordered reduced to such proportions of the cluster as are necessary for safety. The illumination of advertising announcements, signs and external ornamentation of buildings is also ordered discontinued on Monday and Tuesday, as is also the use of lights for illuminating shop windows.

In referring to the order, President W. A. Brackentridge, of the Southern California Edison Company, said:  
"The company will co-operate with the Fuel Administration in every possible way, in the restriction of the use of electricity for street lights, signs and advertising lighting, and in every kind of lighting which might be considered unnecessary, and which might be discontinued without jeopardizing public safety."

"The company will take up with the proper officials in each of the cities and towns where it furnishes service, the question of which street lights may be discontinued or reduced, and it will also have its representatives personally explain to the large consumers why signs, displays and window lighting should be discontinued, reduced or minimized, in accordance with the desire of the Fuel Administration."

### Make Loan Payments at the Bank

# Temperance Notes

(Conducted by the National Woman's Christian Temperance Union.)

**CONSERVE! CONSERVE!**  
Oh, you do, you!  
We women are leading  
The way to the best,  
We'll not wear blind  
And carry the worst,  
Add faith to the good,  
And you'll see your  
And still keep away.  
And  
We'll save our money and buy a bond,  
That, Uncle Sam,  
Please, won't you close the brewer?  
Oh, you do, you!  
We'll hear the cry  
For conservation,  
We'll do or die—  
We'll talk and try,  
We'll stop and save,  
And work and save,  
Our bread for every meal we eat,  
And give our allies the best of the wheat,  
We'll save our money for stamps of Thrift  
To give Liberty's cause a hearty lift.  
But, Uncle Sam,  
Why do you not close the brewer?  
—Margaret E. Platt.

## WHAT LIFE INSURANCE RECORDS TELL.

The Life Extension Institute, of which Prof. Irving Fisher of Yale is chairman, and ex-President William Howard Taft is president of the board of directors, published a report of the activities of 43 American life insurance companies covering a period of 25 years from 1885, showing the increased mortality of moderate users of alcoholic liquors. These records were kept without any reference to the political issue, and reveal that:

1. Very moderate users of liquor increased their death rate by 18 per cent over the normal rate.
  2. Moderate users of liquor with an occasional excess, increased their death rate by 50 per cent over the normal rate.
  3. Those who drank more than two glasses of beer or more than one glass of whiskey per day and yet were considered acceptable standard risks for insurance, increased their death rate by 80 per cent above the normal rate.
  4. These three classes of insured moderate drinkers increased their mortality by an average of 51.3 per cent.
- The death rate recorded by these communities includes only men sufficiently temperate to secure a life insurance policy. If we add to these records of heavy drinkers who cannot get life insurance the death rate from liquor will be largely increased.
- The comparisons in this report are with the average mortality of all insured men, including the users of liquor. If it had been made with the total abstainers the difference in mortality would have been even greater.

## THRIFT STAMPS ON SALE

War thrift stamps and war saving certificates, otherwise known as Liberty Bonds, are now on sale at the Owensmouth postoffice. The stamps sell at 25 cents each. The bonds cost and are payable in 1923, at which time each certificate will be worth \$1.

War Tax Revenue stamps are now on sale at the postoffice. All legal papers now must carry revenue stamps.

All parcel post packages on which the postage is 25 cents or more are required to have affixed a war revenue stamp of 1 cent for each 25 cents in postage.

## THE BUSINESS VIEW.

The time is not far distant when a prohibition line will surround mills and factories, even as schools and churches are now protected, within which no liquor will be sold. It is big business now to buy talking, not only preachers and reformers. Large financial interests are at stake. Competition is so close that the very existence of factories in the race for trade and maintenance is threatened unless the field be a clear one with no mill discounted by lower standards of wages than another. No business will tolerate the drink habit today. Trust companies presided over by brewers are frowned by the investor. Time was when the brilliant alcoholic could hold his place in almost any job or profession. That time is past. Industry and education have come to realize that dependability is better than brains as favored by the investor. Liquor is more common with men of affairs than with those whose brains are muddled with alcohol.—Yarwood Times.

## PREPARING FOR PROHIBITION.

The directors of the California Wine association included in their last annual report recommendations that who stocks be disposed of and that wine men prepare for prohibition. The report declares the directors have decided that further pursuit of a business with a future so uncertain is not wise. Wine men!

Women of the suffrage states, when we select your votes just remember that if they had their way you would have no votes to give.

H. J. Whitely Ranch

**The Reason Why.**  
The difference in the complexion of people is due to the varying amount of pigment or coloring matter in the cells of which the skins of all animals are made. Very light people have very little pigment; very dark people, those with dark eyes and black hair, have a great deal of this coloring matter in their cells.

A great many people are neither light nor very dark. They have less than the dark complexioned people and more than the light complexioned people. When the hair turns gray it is because the pigment has disappeared. As this is due to the loss of this coloring matter, dark complexioned people turn gray sooner than light complexioned people. The structure of the skin showing how these cells are made in layers can be seen by examining the skin with a microscope.

**Pigs and People.**  
So like is the pig's eye to the human eye that fudging, counting, bearing their trade, practice all sorts of operations upon eyes of freshly killed swine, which are easily obtained from the market.

Even the skilled and highly trained ophthalmologist, whose business is to try out an idea—for instance, a new kind of operation for cataract (which means the removal of the crystalline lens)—will get a pig's eye and see how it works. If it succeeds, he tries it on a patient.

All the wonderful music-cutting operations by which equal and exact regularities are so successfully remedied, were worked out originally by experiments with pig's eyes.

**That Loose Shoe String.**  
Litts often leads to serious consequences. So it is not surprising to learn that recently an employee of a large manufacturing establishment was coming down the stairway from the third floor of the warehouse, when the string in one of his shoes became untied. He continued to go down the stairs, and when about five steps from the landing he stepped on the loose shoe lace, which threw him, and he fell, striking his head on a beam on the bottom step with such force that he died the next morning. Which proves as that one cannot afford to be careless, even in such trivial details as loose shoe strings.—Scientific American.

**Republican Voters of Owsenmouth**

You will be glad to hear that the Ninth Congressional District, stretching from Lancaster in the Antelope Valley to Long Beach on the sea, is forming itself into one immense camp to prevent the nominating of a non-Republican pacifist on the Republican ticket. This is being accomplished by overwhelming concentration of all Republican forces on

**MONTAVILLE FLOWERS**  
The Man Who Will Be Nominated.

The individual voters are for him. The great Republican newspapers are for him. Party leaders are for him. He stands for every principle you advocate and has courage and ability to fight for them. This organization has no criticism of other Republican candidates. But only one can be nominated. Flowers is the only possible winner. Every vote cast for another Republican candidate is the same as a vote cast for a pacifist.

A business man to the legislature for an economical administration

**JOHN E. FINNALL**  
Republican Candidate  
ASSEMBLY MAN  
61st District  
For a Dry Nation  
A resident of this district 35 years

Lost—late Monday afternoon, between Winnetka Ave. and Owensmouth, a gentleman's gray sweater. Finder please communicate with Mr. Burgess at State Bank of Owensmouth.

**A BUSINESS MAN FOR LEGISLATURE—JOHN E. FINNALL, FOR ASSEMBLY MAN**

John E. Finnall, well known business man and candidate for Assembly the Sixty-first District on the Republican ticket, was in Owensmouth today talking friends and interviewing voters on the subject of his candidacy. Mr. Finnall, having been born in this district thirty seven years ago, and lived here all his life, feels that he is thoroughly acquainted with the conditions and wants of the people of this district. Being a business man, he stands for strict economy in the State affairs, and will do his utmost to eliminate all unnecessary expense, insisting upon an economical and efficient administration. He is for the ratification of the National Dry Amendment and stands for equal suffrage. Mr. Finnall, besides being a business man, is also interested in farming, and will be able to represent the rural districts in an intelligent manner on legislation that affects the farming communities. Realizing that the present conditions caused by the war and the readjustment is to be followed by the essential changes in the large farming district should be represented by an able man, one who can successfully handle the important legislation that will be needed in this district. He is sure that the voters will give him a good majority at the primary election on August 21st, as it will be no longer to this district to send such a thoroughly experienced man to the State Legislature.

Judge Thomas P. White, who is candidate for Judge of the Superior Court, has been a lifelong resident of Los Angeles.

On the record he has made on the bench during the last five years, he appears before the voters of Los Angeles County as an aspirant for higher judicial honors. The experience that he has gained as a dispenser of justice in a court that comes in daily contact with every phase of life has made him the best equipped candidate that has ever appeared to the Superior Bench. Judge White is a self-made man in every sense. In his high school days he worked afternoons and on Saturdays in an East Los Angeles grocery store. When he was graduated he entered the employ of the Santa Fe Railroad as a stenographer, and later he became rate clerk and assistant to the trainmaster at Needles, Cal. In this way he earned sufficient to pay his way through the College of Law of the University of Southern California. Immediately after his graduation he began the practice of law in Los Angeles and he became associated with some of the most important criminal and civil cases in the history of the state.

In 1912 he was appointed to succeed Police Judge Rose when the latter was elected Mayor of Los Angeles. At the general election in 1914 Judge White was chosen to the office for a term of four years by the largest vote ever cast for a police judge. Judge White founded the Women's Court, urged the establishment of

**SENATORIAL FIGHT IN THIRTY-SIXTH DISTRICT**

William J. Carr, the incumbent, is the candidate for the Republican nomination. W. F. Knight of Pasadena is out after both the Republican and Democratic nominations.

Senator Carr has been City Attorney of Pasadena, where he made a fine record. He has served the district for three years in the Senate, and is one of the most influential members of that body. His opponent is new and untried.

Senator Carr has made a fine dry record in the legislature. In the 1917 session he introduced and handled in the Senate the County Unit Bill of the Anti-Saloon League. Had this passed, it would be possible to close up Vernon and similar places. He is endorsed by the Dry Ratification Committee. His opponent has but recently publicly espoused the dry cause.

Senator Carr stands squarely against the assault, certain to be made, against the great constructive accomplishments of the last eight years. His opponent has been opposed to this legislation.

Under Governor Johnson's administration the State should economize in every way possible without crippling the vital governmental agencies. To effect economy in the administrative machinery of the State, Senator Carr will accomplish much more than could his opponent, who has no experience would render him ineffective, and whose well-known unfeeling attitude toward the vital things which must not be sacrificed would tend to arouse suspicion as to his motives in anything he might attempt.

Senator Carr will represent solely the public interest. His opponent has disqualified himself from representing the public interest on an important line of legislation, by standing as the candidate of the Association for the Betterment of Public Service organization, one of the astounding principles of which its opposition to any measure affecting the relations between capital and labor unless approved by the accredited representatives of each. It frequently happens that the interest demands the adoption of laws which are opposed by capital or by labor or sometimes by both. It will be remembered that the Workmen's Compensation Law was passed by capital and the Minimum Wage Law for Women by both capital and labor. Yet both of these measures were right and in the public interest.

Senator Carr is powerfully endorsed by such men as Dr. J. A. B. Scherer, Lieutenant Governor of J. Wallace, Judge J. P. Wood, C. W. Kolser, manager of the Pasadena Municipal League.

Take your shoes and harness to the Electric Shoe Hospital for repairs.

Department, and W. B. Mathews, formerly Los Angeles City Attorney, and now Counsel for the Bureau of Public Service.

The next legislature will be a legislature and the most important in the state's history. Now is a poor time for experiments. Vote for Senator Carr at the Primaries.

CHAMPAIGN COMMITTEE, CASSER OF COMMERCE BLDG., PASADENA, CAL. Tel. No. Fair Oaks 384.

**LET'S GIVE FLOWERS A RECORD-BREAKING VOTE**

By the attempt of Mr. Flowers' opponents to confuse voters by making false accusations against him has had the effect of rallying all Republican forces behind this staunch American.

The strength of Mr. Flowers lies in the fact that he is strong in every nook of the great district. He is not merely strong in spots, he is strong everywhere. He is not merely strong with a few classes but with all classes. The petty insinuation that he worked against the Republican Party in 1912 is malicious and contemptible. Mr. Flowers has been a Republican all his life. He dedicated his services to the Republican National Committees for Taft

**Big Ben**  
the clock you've read so much about in the magazines, arrived in our store yesterday with 23 brothers.

'They're the finest alarm clocks we've ever laid eyes on. They're built right and right from the ground up. We're practical clock men and we know.

'They'll be in our window for the rest of the week and we wish you'd come in and look them over. On account of increased cost of material, Big Ben and Baby time are now \$3 each. Sold by A. E. HARTMAN, Van Nuys

and Huges. "But how about 1912?" he is asked. Mr. Flowers has no apology to make. In 1912 he was selected as head of the speakers' bureau and campaigned the country in the interest of that great American patriot and Republican leader, Theodore Roosevelt. "It is a crime to have worked for Col. Roosevelt," said Mr. Flowers in a recent address. "Let my enemies make the most of it. But his enemies carefully refrain from telling the facts. They attempt to cast discredit on him by asking in an accusing manner, 'What were you doing in 1912?'"

Probably other equally malicious untruths will be sprung too late for Mr. Flowers to make denial. You may be sure they are untrue.

These un-American tactics on the part of candidates condemn them as unfit for service in Washington where great questions of moral justice must be dealt with. We are fighting Germany on moral issues. Do you want a clean, powerful, honorable man in congress to represent you, or do you want to entrust the national destiny to small political tricksters? The answer will be given on election day. The Ninth District is aroused. Montaville Flowers will be nominated by an overwhelming vote.
