

The Owensmouth Gazette... M. L. Lawrence, Editor and Proprietor... Published Every Friday from the Publishing Block, 15 Sherman Way, Owensmouth, California.

Entered through the Postoffice as second class matter January 20, 1914, at Owensmouth, California, under Postoffice No. 1179.

Advertising Rates (Daily): First rate, per inch... Over five weeks, per inch... No advertising accepted for less than 25 cents.

The Gazette solicits communications from its readers... and is pleased to publish them... unless in time to reach the office no later than 12:00 noon.

THE CALL OF THE HOUR

We know of no more worthy expenditure here that will return greater results to its city's lowest integrity and the perpetration of a crime than the use of the last dollars, which could be made to go farthest for the investment, than that of the neglected job of the streets on North Carson avenue.

Candidates for commission in the city should mind this as a special matter of personal attention. As yet no one has been named the street side to the city unless we have been told the name.

We have been a neighborhood long time with the city, and it is now quite a different neighborhood, and we are getting acquainted. Let us have the same satisfaction in our work as their time well spent coming out here to assist in what we may do, and then let us what they will, and then let us live up to their word.

A MAGAZINE OF HIGH REPUTATION... California in all its diversified activity is caught in a glance in review... "The Golden West" is a highly edited literary magazine published in the local field.

As we met the editor, Charles E. Hoke, and in the course of a particular interesting magazine it is occasionally brought up to a most unique way. It is a literary feat for the publisher and literary life here.

It appears with emphasis to the commercial and society world... of Bussell Land and give rise to the favorable criticism of all walks in life who are a distinctly more progressive with wisdom pride. Editor Hoke and his estimable wife, Mrs. Hoke, Charles Hoke, are associated together in the management and the welfare sentiment and administrative expression from their own side the lower reaches of the trade here to a higher plane of principle and duty.

Here you get most some people... De. Harty, but when 49 or 50 Mr. De Harty's great drive of 10 to 15 miles an hour was mentioned.

He had had with the highest rate of the Elliott-Burt Bachgo again on the opposite side of the State High way, it was a fine advertisement for the Owensmouth. But can we be sure we are getting the benefit of this good advertising? What percentage of the travel from Hollywood as much as the name of the town two miles to the northward, to say nothing of the Suburban as a business and recreation? What Owensmouth does not do in a great many ways, it is a highly attractive point to go to, to gain the eye, and so large that the reader is attracted by it and that he can get the message as he passes.

It is a good idea to have a school, and so the people as well as our advertisers, but unless we do our advertising, we will not be able to do it. And when our progressive people are so conservative and so backward, how can we be prepared to do it?

The California State Railway commission has ruled Postoffice No. 1179, Owensmouth, under increasing obligation.

Uncle Sam Sets a Good Example

We increased the tobacco habit, restricting it. There are 200,000 of the soldiers who went overseas to France. In some form, according to the War Department, there were 200,000 cigars were sent to the troops prior to the signing of the armistice. Since the fighting ceased, smoking has increased and the War Department men's average monthly average of tobacco average 500 amounts to 435 million cigars and 10 million cigarettes.

The Gazette heartily endorses the "get-together" idea, suggested by its good editor, in this San Fernando Valley. Why not? We need to break the monotony of the everyday grind, and this would be good, socially and educationally, at the same time that it would break the monotony of the everyday grind.

July 1 has been fixed as the date on which the voters of the state will be called upon to accept or reject the issue of \$40,000,000 of state bonds for highway purposes, as proposed by the recent session of the legislature. If the bonds carry the money will be available shortly after the issue date, and the road work will thus give employment to many returning soldiers.

All the great powers and resources which have been sleeping in earth and air and sky from the garden of Eden down to today have been waiting for man to invent and use them. Man has received only so much as he has actually taken possession of. Only a few things have been used, and we have but just begun to acquire them.

VIEW OF U. S. CAPITOL DURING PAINTING. The dome of the United States Capitol at Washington is kept in almost constant repainting every few years. For this work forty painters are usually employed for five months' time. Over five thousand gallons of paint are required for one coat. The reason for painting the Capitol dome at regular intervals is to prevent disintegration of masonry surface.

THE COSMETIC OF THE INMATE.

"I am the savior of surfaces. "I am the world's preserver. "I know me, for he picked up the ark within and without. "The Pharmacia sought me as an adornment for their tombs— their mummies endure because of me. "I am the woad of the ancient Britons— their blue hiltie hair. "Because of me the treasures of the Sistine Chapel defy effacement."

"I am the keeper of the antique. "I am the servant of progress. "Columbus found me bedecking the savages who watched him plant Ferdinand's banner on the shores of New Spain; and the very sails of his caravels retained the elements of the West through my aid. "The pioneers westward wended their way daubed the primitive schooners with my protection. "I am the royal robes of civilization's monarchs, Steel and Lumber."

"I am the wings of the airplane giant under my protective veneer. "I am the sun's draught and the homing transport pool of seas imperious to corrosion because of me. "I waterproof your agents of destruction, the bullet and the shell. "I drew the mercy of my concealing camouflage over your hospitals. "I gladden on the homes, and on the barns, and on the cement floors where life, I am able. "Where death and decay set in my essence hastens them. "I save of Surface, I am PAINT!"

NOTE FOR PUBLICATION (Non-Profit) Withholdings: Department of the Interior, U. S. Land Office at Los Angeles, Cal., May 18, 1918.

FED GRAIN TO MILK COVS

About 20 Cow Milk Co. are Milk to be used in the State.

The question of whether milk cows should be given feed while they are producing on pasture depends on the cost of the pasture and extra feed.

Mr. W. F. Fowler of Oklahoma, A. S. M., writes at Chickadee, Ariz., cows will be about 20 per cent more milk when they are fed.

Heavy producing cows of the concentrated feed are generally about as much as the value of the increase.

Mr. W. F. Fowler of Oklahoma, A. S. M., writes at Chickadee, Ariz., cows will be about 20 per cent more milk when they are fed.

Mr. W. F. Fowler of Oklahoma, A. S. M., writes at Chickadee, Ariz., cows will be about 20 per cent more milk when they are fed.
