GLOBE

HAND-MADE WRAPPED-TREAD TIRES

Guaranteed 6000 Miles

What is a Single-Cure, Wrapped-Tread Tire?

It is a tire built by a special process which eliminates the necessity of curing tires under tremendous hydraulic pressure. Such pressure used in making ordinary tires, for the sake of quick production, is responsible for the flattening of fibres which results in premature "blow-outs" or limited mileage. In the "single-cure, wrapped-tread" method, we weld together the various "ingredients" of the tire without jamming or displacing a single element. In this way only it is possible to conserve the native strength and resiliency of the fabric which forms the foundation of long-mileage. It is the "single-cure, wrapped-tread" process that has made the Globe hand-made tires the longest mileage tire ever produced. Is your automobile "Globe-Shod"? Sold by all first-class dealers.

Fortunate is Our Country. It is stated that the United States has 4 per cent of the world's population and 33 per cent of its wealth. In other words, one-twentieth of the people and one-third of the money of the whole world.

Strongly for education. We have always believed in the high possibilities of the native and more particularly since a charming girl told me she had found you could hold hands just as well as an oblongal tin as any other—Grand Rapids.
