THE KITCHEN CABINET

THREE MEALS A DAY.

The very early problem of preparing nutritious food in the kitchen was a real one. The kitchen was a place where the women of the world, in the work of the day, were often called upon to prepare the food for the household.

The latest trend in this line is worth considering. It is a fact that in our modern kitchen, the work of the woman is not so much a matter of preparing food, but of preparing it in a way that is both economical and healthful.

WHAT TO EAT.

Food made with intelligence in the kitchen, under the guidance of a trained dietitian, is a great help to the health of the individual.

The Kitchen Cabinet is a complete kitchen, with a built-in sink, stove, and refrigerator. It is a real improvement over the old kitchen, and it is a real improvement over the old kitchen.
