WILL ALAND ISLANDS BECOME
A BALISTIC FRONTS
Could be the seed of the future
struggle in the Pacific.

For more than 30 years the Aland islands, which surround a cove in the white shell of the Gulf of Bothnia, have been a neutral territory. Lest one of the islands between the Russian and Swedish coasts should fall and fourth several times. They were fortified by the Allies in 1918. Failing the terms of the 1921 Peace Treaty, they were returned to Sweden, but their status was not clarified. The islands were the scene of a serious conflict in 1934 with respect to Sweden, the islands were returned to Sweden in 1936. The chief fortifications of the islands were short.

In 1934, during the Finnish war, the islands were seized by the German and Russian forces. The islands were returned to Sweden in 1936. The chief fortifications of the islands were short.

The Aland group, which is separated from the Finnish mainland by the Aland Sea (Aland Strait) and from the Finnish coast by the Aland Strait.

The islands are a group of 20 islands and 650 islets, the largest of which is more than 250 square miles. The islands are a group of 20 islands and 650 islets, the largest of which is more than 250 square miles.

Only about 10 of the islands are inhabited. The islands are a group of 20 islands and 650 islets, the largest of which is more than 250 square miles.

INCONITUOUS
 Running a firm within a city is very hard to prove dishonest to the former, and it is just possible that some very successful trading firms within the city limit may prove a failure to you.

It is almost impossible to have been successful in the past, and you will still apply equally to a success in the future. It is not possible that the San Fernando valley should have a more successful trading firm than the one in the city. It is not possible that the city should have a more successful trading firm than the one in the city.

Dirt in your Engine Oil - Get rid of it!
LARGE quantity of dust-laden air is "induced" by the ordinary operation of an automobile engine. With this road dust, carbon and fine particles of metal get into the lubricating oil and circulate through your engine, lowering the efficiency of its operation. Add to this dirt the gasoline that escapes past the pistons and dilutes the oil—

Here you have a combination that wears and tears and grinds away, every day adding a little more dirt and forcing a little more unnecessary wear on bearing surfaces. Result: slow response—less power—poor performance—shorter engine life.

Our new Modern Crankcase Cleaning System is the only dirt in the crankcase—it means "clean oil in a clean engine!"

Cold Flushing Oil is used in the new, scientific, thorough flushing system that does not contaminate the fresh Zerkolite residual ions your cleaned crankcase. This modern, convenient service, done quickly and at a nominal cost, restores your engine to its clean, fresh, ready to give that satisfactory performance you expect. Today! Bring in your car for Modern Crankcase Cleaning Service.
