# The Telephone Instrument

The telephone is a highly sensitive, delicately adjusted instrument. Think of it—without regard to distance, instantaneously reproducing every tone of the human voice.

The quality of its service, in great measure, depends upon careful use.

As with your watch, automobile or piano—the more care, better results.

Among the "out of order" reports received by a company, many result from the carelessness of the subscriber. A telephone may fall from desk or stand, breaking the microphone or throwing the apparatus out of adjustment. The cord may become twisted; causing a "fuzzy" line. A clamp click laid on the cord or the resistance from an open window may mean the "short circuit" and an entire interruption of service.

All of these things are avoidable with the exercise of slight care. In protecting the telephone equipment you are protecting your own service.

## Have You Ever Wondered Why Your Car Rattles?

**WHAT CAUSES that elusive rattle?** From whence cometh the hidden rattle that yakketh not to lubrication? These are questions that the average car owner is not prepared to solve. The squeaks and rattles endure. Nothing is so disconcerting. Nothing takes so much of the pleasure out of motoring, as it is more embarrassing to the car owner.

Rattles and squeaks are not always due to lubricant or insufficient lubrication. Often the trouble is mechanical, and requires the attention of an expert. If you have squeaks or rattles that you can't find, bring the car to us, we make a study of such things and can help you.

Motor repairing, tune and valancing.
