

CONFIDENCE

"After the lecture the speaker will say for a few minutes and answer any question that may be asked of him."

"I wish I had the confidence of last week."

"We got five small children and I'll say that I could answer any question they put to me."

"He Didn't Laugh."
"Having the confidence he better said the speaker might have thought he was laughing with the ladies."

"You know how nervous I got when I had to speak before the crowd last week. I wish I had the confidence of last week."

"The Majority Had It."
"The majority of the audience here received a call on passing from an actor on the other evening."

"The roof falls" erred the top-down.

Better Tillage and Less Work In Fruit Growing

BETTER care of fruit are now assured because more thorough tillage is possible now that Fordson power is available by attachment by the use of the special OLIVER CHICARD GARD. And now that one man can do for more work, the Fordson brings about reduced expense.

At the same time the OLIVER CHILLER PLOW WORKER performed the No. 7 Plow it also developed a special orchard plow of similar design.

By reducing the number of parts in this plow and making them of light, heat-treated steel, the weight is greatly reduced and this, together with other improvements, makes it extremely light-running. It has three bottom, one of which may be removed for work in an open field.

Trees or vines hanging as low as 26 inches from the ground will not be torn because there are no levers to interfere. The bottom are made by a simple power lift operated by a short trip-rope.

Danger of barbing trees is removed by placing the hand wheel within the cut of the rear bottom. This, together with an adjustable kick, permits cultivating close to the trees on either side.

"The Line Is Busy"

"When the telephone operator tells you 'the line is busy,' this fact has been made known to her by an electric signal. With the thousands of calls in daily telephone traffic, it is necessary for the operator to secure this information, were compelled to listen on the line of the party called, prompt service would be out of the question.

This delay is eliminated by a electric device which in the fraction of a second automatically indicates that the line called for is in use.

When "busy" reports are repeated on successive calls for the same number, it is generally due to an immediate use of the called line. The length of a telephone conversation is obviously beyond the control of the telephone operator. Have confidence in her when she makes the report "the line is busy."

The telephone operator tells you "the line is busy," this fact has been made known to her by an electric signal.
