And Now - Profit in Farming
Without the Drudgery

FORDSON power makes more productive beds and the tractor does its work so rapidly that farm drudgery is passing. Expenses are reduced. Better crops are grown.

For the job of plowing tough or sticky soil, Fordson farmers use the OLIVER DISC PLOW and do the work easily and well. The thoroughness of its work, lends this plow standard equipment to all the Fordson.

Penetration in the toughest soils is assured by the design of the plow which throws its weight to the cutting edge of the discs where they enter the ground. This penetration is equally rapid for different soils. By simply turning "Frank screw, the penetrating power is increased or decreased.

Improved scrapers give a modified effect. They leave a well pulverized seed bed and cover all trash.

To farm the new way means to earn an investment that is within easy reach of every farmer. Come in and see the Fordson and the OLIVER SCRAPER. Done Right for the Farmer, and you, too, will find that a Fordson is your best investment.

USE OF CHOKO COIL AND TRANSFORMERS

Letter Provide the Most Practical Method of Coupling for the Amateur.

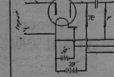

Figure XXVIII shows the actual circuit of a three-stage vacuum-tube amplifier. The coupling between the stages is of the inductive type. The coupling between the first and second stages is of the inductive type. The coupling between the second and third stages is of the inductive type. The coupling between the third stage and the load is of the inductive type.

The square C is merely a means of allowing the potential variations across the coupling transformer to be applied to the grid of the next stage. The square D is merely a means of allowing the potential variations across the coupling transformer to be applied to the grid of the next stage.

Two separate and distinct circuits are shown.

Transformer Coupling Fig. XXVIII

Reversible Coupled Amplifier Fig. XXIX

It is an advantage to have the amplifier in such a position that it can be used in either direction. This is accomplished by the use of a reversible coupling mechanism.

LINOLEUM

All this Week in our Linoleum Department, we are showing, for the first time, full line of Armstrong's Linoleum patterns.

You are invited to come in and see for yourself the many unusual effects which we are displaying in all colors, including blues, purples and printed linoleum. Never before have we shown such a variety of patterns and colors. No longer in linoleum considered a conservative for kitchens and bathrooms. Today they are being used in living rooms, bedrooms, and corridors, because of their beauty, because of their durability, because of their ease of cleaning, and their beautiful patterns and coloring blend harmoniously with interior decorative schemes.

If neither you have a business or a residential floor to cover, we urge you to look over our attractive linoleum patterns.

Visit us any time this week.
