The KITCHEN CABINET

For the family meal, we give you more than a place to put your food. We give you a place to store it, a place to clean it, a place to serve it, a place to eat it. We give you a place to store your dishes, a place to store your glasses, a place to store your silver, a place to store your books, a place to store your toys, a place to store your clothes, a place to store your shoes, a place to store your hats, a place to store your coats, a place to store your bags, a place to store your umbrellas, a place to store your trunks, a place to store your suitcases, a place to store your boxes, a place to store your baskets, a place to store your crates, a place to store your barrels, a place to store your casks, a place to store your kegs, a place to store your barrels, a place to store your casks, a place to store your kegs.

FOR THE FAMILY MEAL

The food economy need just adds to a reasonable estimate of the family household.

Only the **KITCHEN CABINET** can give you a good first floor of a kitchen cabinet that will do the most for your family.

Modern kitchen cabinets are made of hard maple. All the other woods are too soft for the work they have to do.

Look for the **KITCHEN CABINET** in the store where you buy your food. It is the best value for your money.

FRIGHT PAID—Make a contract of your own, with your own terms, and ship your goods to any part of the world. We will handle the shipping for you. We will insure your goods. We will deliver your goods to your door.

REGENERATIVE SET COSTLY BUT USEFUL

Methods for converting the Simple Vacuum Tube Receiver into a Great Many

There are a great many amateur who own and operate radio receiving sets using vacuum tube detectors who would like to have regenerative receivers. Regenerative receivers, however, are relatively expensive because of the high quality components used in their construction.

The regenerative circuit is desirable to spite of some difficulties, because by covering the various tube detector sets a regeneration circuit can be used. This is a very important feature in that it allows the amateur to use a single tube receiver in connection with a single coil.

It is possible to use a single tube receiver in connection with a single coil. This is a very important feature in that it allows the amateur to use a single tube receiver in connection with a single coil.
