

General

THE UNIVERSAL CAR

Four Reasons Why You Should Buy Your Ford Car This Month

I The unprecedented demand for Ford Cars throughout the winter months has taken the entire output of the Ford plant's working capacity, indicating that the demand this Spring will be far in excess of the number of Ford Cars that can possibly be built.

II January was the tenth consecutive month in which retail deliveries exceeded 100,000 Ford Cars and Trucks. Requirements for February, the month when preparations are already under way for Spring business, called for 148,000 Cars and Trucks—more than 24,000 in excess of the number we can possibly produce.

III Ford dealers in many parts of the country are already finding it necessary to specify future delivery dates on Ford Products because there are no reserves to draw from.

IV Your order placed now will protect you against delay or disappointment later on—it is the only way you can be assured of reasonably prompt delivery.

We consider it important to give you these facts, so that if you are planning to purchase a Ford Car, Truck or Fordson Tractor for use this Spring or Summer, you can list your order at once and take advantage of our dealer's first opportunity to make delivery.

MANURE USED TO INCREASE CROPS

Additional of Acid Phosphate Will Make Almost Fourfold Return in Yields.

DEFICIENCY IN PHOSPHORUS

Necessary to Supplement Fertilizer With Lacking Element—Best Methods of Handling Corrected

Natural manure is used by many successful farmers as an economical means of increasing crop yields and maintaining soil fertility. But the composition of herbage manure on the soil and building and producing applications to it are generally such that it will give the largest returns from manure to be used by application to the soil in the largest it is deficient.

A ton of average herbage manure contains one-half ton of nitrogen, two pounds of phosphorus, and eight pounds of potassium, according to J. F. Wallace, scientist in the soils department of the United States Department of Agriculture. Compared with one ton of a well-balanced commercial fertilizer such as 3-12-6, one can see that manure lacks in its ratio of the elements of phosphorus. This is not true, however, as the ratio is not so far from that required to produce good crops as the nitrogen and potash.

To Correct Deficiency. Although natural manure contains the composition of many fertilizers, manure has had methods of handling which correct its deficiency. Only the manure with natural phosphorus, however, and that is only the manure with natural phosphorus.

Many soils are deficient in phosphorus and the manure which is applied in it is usually in the form of a phosphate fertilizer.

MUCH ADVANTAGE IN BULL ASSOCIATIONS

Increased From 158 to 190 in Different States.

Few Fail to Improve Where Farmers Have Not Yet Alike to Buy, Improve and Sell—Grade Heads Show Effect

Presented to the United States Department of Agriculture the number of cooperative bull associations in the country increased from 158 to 190. These organizations, which were developed by the extension and the activities of the United States Department of Agriculture and the live stock industry, now are 107 in total. This includes 104 in the live stock industry and the list of states where such associations are active.

Presented to the United States Department of Agriculture the number of cooperative bull associations in the country increased from 158 to 190. These organizations, which were developed by the extension and the activities of the United States Department of Agriculture and the live stock industry, now are 107 in total. This includes 104 in the live stock industry and the list of states where such associations are active.

Grade Interest Unbroken. Live stock associations have been formed in Illinois. These associations have proved a great advantage in connection with individual farmers who are unable to buy for their own improvement and the improvement of their own stock. They are organized in a number of ways, such as to buy grade heads of both sexes and to sell them to the members of the association. They also buy grade heads of both sexes and to sell them to the members of the association.

What Good Highways Mean. Amateurs of Golfing Influence of Better Construction on Game. Think of the highways for what they are, and not simply as roads between farms, or as means of rapid movement of goods, mail, merchandise and other traffic. Let your imagination carry you far.

Measure Spreader in Operation. By adding an 80 percent of water to a small quantity of phosphate fertilizer, a well-balanced fertilizer can be made. Results from the Minnesota experiment show that the application of phosphate fertilizer in water will give a 100 percent increase in the yield of crops.

Protect Live Stock Owner. Federal Inspector May Close Wash and Movable Foot and Mouth Disease.

The live stock producers of the United States are being warned about the dangers of various plagues of disease which may be brought into the country by quarantine regulations enforced by the Federal Government. These regulations are now in effect and will be enforced in the future.

Like Hard Surface Roads. Machine or Broken Stone Material Being Considered for Cement Concrete.

The ordinary broken stone of which the roads are made is not so good as the concrete which is now being used. The concrete is made of a mixture of cement and broken stone and is much stronger than the ordinary broken stone.

MUCH LOSS FROM PNEUMONIA
Disease Contracted by Animals Suffering in Wet Houses and Exposed to Drafts.

From year made plan the best pneumonia contracted by these animals is due to colds, draftiness, dampness, wet draughts, and exposure to cold winds. The best way to prevent this disease is to keep the animals warm and dry, and to use a good disinfectant. Our disinfectant is a mixture of formalin and water, and it is easy to use. It kills all germs and keeps the air fresh.

Buy a big machine now at a special price. Our big machine is the best in the world. It is made of the finest materials and is built to last. It is easy to use and does not require much attention. It is the best investment you can make.

BUYING KITCHEN STOVE OR RANGE

Convenient Position Should Be Decided Upon Before Any Selection is Made.

ALLOW FOR OPENING OF DOOR

Hot Water Boiler Should Never Be Placed Below Range of Free-Boiler Four Burner or Five Burner Free-Boiler Range.

Placed in a position where the door is opened, the water will be thrown into the room and may cause injury to persons standing nearby. For this reason, the water should be thrown into a sink or tub, or into a pan of water.

When buying a range, it is important to check the door opening. The door should be able to open without hitting anything. If the door is too narrow, it will be difficult to open and may cause injury.

When buying a range, it is important to check the door opening. The door should be able to open without hitting anything. If the door is too narrow, it will be difficult to open and may cause injury.

LEFT-OVER RICE FOR MAKING HOT MUFFINS

Easiest Way for Disposing of Waste Material.

Approved by the United States Department of Agriculture, this recipe will enable you to dispose of your left-over rice in a most economical and efficient manner.

Rice Muffins.
1 cup left-over rice, 1 egg, 1/2 cup sugar, 1/2 cup butter, 1/2 cup milk, 1/2 cup oil, 1/2 cup baking powder, 1/2 cup flour, 1/2 cup salt.

Preparation: Preheat oven to 400 degrees. Grease muffin tins. Add rice, sugar, butter, milk, oil, baking powder, flour, and salt to a bowl and mix thoroughly.

Bake in muffin tins for 15-20 minutes. The muffins will be soft and moist, and the rice will be well cooked.

Rice and Corn Muffins.
1 cup left-over rice, 1/2 cup cornmeal, 1/2 cup sugar, 1/2 cup butter, 1/2 cup milk, 1/2 cup oil, 1/2 cup baking powder, 1/2 cup flour, 1/2 cup salt.

Preparation: Preheat oven to 400 degrees. Grease muffin tins. Add rice, cornmeal, sugar, butter, milk, oil, baking powder, flour, and salt to a bowl and mix thoroughly.

Bake in muffin tins for 15-20 minutes. The muffins will be soft and moist, and the rice will be well cooked.

Cooking Most Dried Fruits.
Most important factor is to clean the fruit in hot water.

Put fruit in a colander and wash with hot water. Then place in a pot of water and boil for 15-20 minutes.

After boiling, drain the fruit and dry it. The fruit will be ready to use.

Household Questions.
This is the best advice for cleaning with a new patent.

Wipe out the tubs occasionally with a cloth dip in kerosene.

Cuplets and carrels are troublesome when they are used.

A grain of salt boiled with the cabbage will remove the disagreeable odor.

At all small places of soap to be used on the same thing it will make it stick to the surface.

Stick a pinch of soap in a corner of a tin and the tin will clean itself.

A few slices of raw potato added to the water will remove the disagreeable odor.
