IN MEMORY OF THOUGHT DEAD

Members City and County in Every Month of the American Legion to Memory of War Heroes.

A monument of "Living Names," to memorialize the heroic dead of 1918-19, of our own country, is to be erected on the most prominent spot in Memorial Park, a new project, which, we, offering to founders, will honor as a credit.

Following through the park to a rock almost hidden in foliage stands an "Honorary Way" filled with the names of those who have died in the service of our country. The names of those who have died in the service of our country are engraved in stone, and the names of those who have died in the service of our country are engraved in stone.

BLACKHEAD IS MOST DEADLY

When Disease Afflicted Members of Pluck Squad the Incident for Treatment.

The most common and deadly disease that afflicts farmers is known as blackhead. It is an acute bacterial disease that causes a fatal hemorrhagic condition in the head and neck of the animal. The disease is caused by a bacterium called *Bacterium anthracis*. It is found in the soil and in the manure of infected animals. The disease is highly contagious and can be spread from one animal to another. It is also highly resistant to heat and can survive in the soil for many years.

As soon as this disease gets to its appearance, the affected animal should be removed to a safe place. The animal should be kept in a clean, dry place and should be given plenty of water. The animal should be kept in a clean, dry place and should be given plenty of water. The animal should be kept in a clean, dry place and should be given plenty of water.
