

SCOUTS

SCOUTS AND "GOOD TURNS"

The "daily good turn," which every boy scout when he joins the ranks of the movement pledges himself to perform, has two impressive illustrations in the following instances:

While returning home from school last night, Scout Max Davis of Jersey City, N. J., noted an American flag attached to a raincoat, sagging behind, flung on the pavement of a wide boulevard. Glancing up the lad saw that a white oval of flags which had been struck across the street for a recent parade had become loosened.

"One end of the line to which the flag was attached was high in a tree," says a New York daily. "The other end was tied to an electric light pole on the opposite side of the street. Up the tree went Max. Untying the knot, he swung the rope around his fingers preparatory to taking up the slack.

"Along the boulevard at that moment came an automobile," continues the story. "Just as Max lifted the rope a bit to tighten it, the car struck the tree. The next instant his fingers torn from his grasp and himself fell from his perch in the tree. Max lay on the ground in an agony of pain. Two passing motorists immediately saw the accident. One dashed after the car. The other summoned an ambulance and rushed to the hospital, where his dangling fingers were amputated just above the knuckles.

"When folks say you how you lost your hand, what are you going to say about a sick world war veteran in the next act.

"You must be jotted off by a rope," answered Max.

"Rightly," replied the doctor. "The veteran, don't do that. You've got something better—a medal—" "You lost your hand," said the doctor. "In the second instance, sixteen-year-old Ralph Scott, Chariton, city of Syracuse, N. Y., through quick and intelligent application of wood-burning in the forest, saved a baby from death from a severed artery. In the desperate moment of crisis, while his parents and friends in a panic stood helplessly watching the child's life ebbing away, he bravely cutting back practice his knowledge, pressed back the opening of the wound, held them in place with a stick and knive, and performed expertly with well-timed the required bandage.

"The three-year-old baby, playing in the fields, saw his father's blood eight miles from Port Byron, N. Y., lay in the gutter and his right foot was almost severed at the ankle," states the Chariton Journal.

"The father, Lynn Van Gilder, miswore the child was in the field, and also believes his little child's blood stains singed the roadside bushes.

"The Good Turn Club is working for the summer on the Van Gilder farm. It sent Chariton boys who had happened over and helped to carry the baby to the farmhouse. In the midst of panic he was the calm, cool person who took charge of things.

"When the doctor came he marvelled a boy could do such an expert job of bandaging and lifting everything as it was, until the child was brought to the Good Shepherd hospital where the war was reported upon."

FROM GOVERNMENT SOURCE—

"If there is anything I can do to help the great boy scout movement you may command me to do it. Don't C. Moore of Idaho, in a communication to James H. West chief scout executive, "If every boy in the country were a member of the Boy Scouts, our problem of legislation would be solved after one generation. The boy scout is better boy at home, at school and on the street. He is the better citizen in the community. The governor is an honorary member.

If you have friends visiting you, let The Greeks know about it. We want all the news but can't get it unless our friends give us the facts.

IMPROVE CEMENT MIXTURE

Samples Tested in the Hope of Obtaining Better Results in Concrete Construction.

Chicago has what may be termed a "sand library." In a series of glass covered cabinets in the structural material research laboratory at Lewis Institute are now arrayed row of little glass bottles filled with sand that have been brought to Chicago from various corners of the world to be tested in the testifier in the hope of producing what

engineers might regard as an ideal concrete mixture.

It is probably the only collection of its kind in existence, and the information contained on the labels of the bottles gives an interesting insight into the part that science is playing in modern undertakings.

The "sand library" was started ten years ago and specimens have been added from time to time until there are more than 2,000 different bottles of sand in the collection. The specimens come from every state in the Union and from Canada, Cuba, Mexico and other foreign countries.

Each sample has been carefully tested and the results of the test are kept in the files. They include the specific of the specimen, the grading, soil content and the results of the colorimetric test for organic impurities. In most instances mortar and concrete tests also have been made. The reasons for the tests were to as-

certify the suitability of the various sands for concrete and mortar work.

The experiments with the various sands were undertaken at the laboratory as a part of the work of experimenting methods that will assist the concrete user in obtaining the best results in the use of the material.

PLANS CITY SMOKE SURVEY

Investigation Will Show the Conditions Existing in Industrial Centers.

The smoke investigation begun by the Mellon Institute of Industrial Research of the University of Pittsburgh in 1912, and vigorously continued in 1914, will be resumed immediately under the direction of Dr. Harry R. Miller, who has resigned as dean of the School of Mines to take up the work.

Systematic surveys of smoke conditions in Pittsburgh, Chicago, Cleveland and other industrial cities will be carried on. They will be made up of complete and correct, dust and soot contamination; research into the manner in which the smoke is carried by peculiarly low temperature convection of stratospheric wind, and investigation of physical means of settling the smoke particles, with particular reference to electrostatic precipitation of smoke.

The survey work has been started with the installation and operation of apparatus for the determination of the smoke content of the air. This phase of the investigation will be continued for a considerable period in a number of cities at the same time. Bulletin will be issued to inform the public.

WHY SHOULD A MERCHANT ADVERTISE?

Replying to this question, one might ask, why should a merchant open his front door? Why should he have a show window? Really, why should a merchant go into business if he does not intend to advertise? Why should a merchant attempt it, if he does not intend for the public to know he is in business and what he has to sell?

Some merchants think of letting the public know when they have some special bargains in goods that have been carried a long time and are somewhat shelf worn and are out of date and must be disposed of. It is then a big struggle is made and new clerks are added for a few days and big sales are enjoyed for a short time, and when it is all over a rest is taken from the unusual ten days' task. But old, easy days are on again and trade has resumed its normal, dull routine. The merchant is content to turn over his merchandise about twice a year, and advertise only to get rid of goods that are slow sale. The idea is gained that advertising is essential only when something has grown stale and is unsalable by the usual efforts—an acknowledgment that advertising is a good thing and will sell goods that otherwise would continue to remain upon the shelves.

If advertising can sell stale and shelf-worn goods, it is proof positive that it can be employed to still greater advantage in multiplying sales of the regular and better stock.

Successful merchants keep their advertising going on all kinds of goods at all seasons, and thus there are no dull periods for them.

Keep your name before the public always—hit it up with your merchandise and the service and bargain to be had in your store, and the pleasure to be enjoyed while in your place of business. Then there is profit in so keeping your name before the people. Put sales talk into your advertising talk, the same as you put in your sales conversation, and you will bring the public into your store. Unless advertising is regarded as a part of the sales effort, it is not being used to its best advantage.

Women Clean Up a Town.

Armed with red pepper and clubs, a married woman of Hamtramck, a suburb of Detroit, Mich., was making the town safe for men and boys. They were waging war on certain questionable women which have been managed by police.

In the first encounter—a raid on a poorhouse—the women were defeated. Their leaders were arrested and jailed. Later they were released, however, and saw new campaign as awaiting execution.

Trees and the Wind.

A useless land is a useless land and a useless land is a useless land. Every block of land deprived of shelter for winter means some decrease in the amount of food produced. The forests which already damage our crops amount of \$400,000,000 a year. Private ownership of the land, loss of forests, public hygiene and financial prosperity call for protection of trees and the birds they shelter.—Nature Magazine.

Planting of Trees.

Street trees may be ordered from 50 to 50 feet apart, depending on the variety, says the American Tree Association of Washington, D. C. Outlets for trees are available in many very commendable for street use, may be planted at the minimum distance seven above, while spruces and oaks require the maximum distance. Additional suggestions for full tree planting will be sent you for a two-cent stamp.

Plants in Right Places.

They are also for lawns and parks, or other open places, but the pine and trees classified as conifers have no place in street planting, says the American Tree Association of Washington, D. C. In laying tree plantings, the owner should be understood. They do not just mean to planting.

A Pleasant Treat.

One of the pleasant treats to live in is one that is big enough to call out the breeze hand when the governor visits the town.

Custom Among Businessmen.

Among the business of South Africa if a man dies his brother inherits his wife and great and the wife and children.

COMMISSION ORDERS RATE REDUCTION

District Manager H. B. Fletcher of the Southern California Edison company received effective today of the rate reductions just ordered by the railroad commission to be effective with meter readings on and after November 15.

The present maximum lighting rate of 25 cents for each kilowatt hour is reduced to 6.5 cents, representing a reduction of 17 per cent. explained the district manager. Corresponding reductions are made in all other lighting rates, bringing these rates down to figures below the rates in effect prior to the world war. Street lighting rates are reduced on the average of 11 per cent, industrial power amounts to 10 per cent and agricultural rates 10 per cent. The total reduction ordered by the railroad commission amounts to \$2,200,000 a year and is the fourth rate reduction of Southern California Edison company since January 1, 1921.

The railroad commission in this order points out that this additional substantial reduction of rates has been made by the company of approximately \$400,000,000 spent by the Edison company in new water power development together with a large increase in demand for light and power throughout the whole territory served by the company and to substantial reductions in the prices in fuel oil, specifically referring to the fact that the increased demand for power in the territory served by the company in 1923 was two and one-half times greater than for the year 1914. This, with the rapid growth of the lighting business and concentration of new power due to heavy development of the territory served by the Edison company, is most convincing evidence of the growth in population and prosperity of the whole territory.

That this fourth reduction in Edison company's rates raises the peak rates during and immediately following the winter indicates in no uncertain manner the determination of the railroad commission to reflect in its pricing the trend of the cost of production and distribution as applied to public utility service with once-handled justice to its consumers and the utilities alike in the preponderance of press comment in announcing the railroad commission's final order is used after more than two years' careful investigation.

The rate payers were represented by twenty-five cities, the City Attorney Association of Southern California, the California Farm Bureau federation, various irrigation districts and land companies and a number of large manufacturers.

There are sixty-seven typewritten pages in the full text of the railroad commission decision," said H. B. Fletcher, vice president and general manager of the Southern California Edison company, yesterday in a communication to District Manager H. B. Fletcher. "We are, of course, giving it a very careful study. As a business study," continued Mr. Ballard, "it covers so many features of the electric business and so many of them concerning it will be impossible and premature to make any statement concerning it still we will be time to thoroughly analyze the result of the study which has been before the railroad commission for more than two years and which has involved not only the best intelligence of the various departments of our own organization, but of the attorney representing a number of cities and farm bureaus of the state. To my mind the outstanding feature of the railroad commission's decision is that the forty million dollars of expenditure for new water power plants in the past few years has made substantial rate reductions possible. Our development program for the future involves an expenditure in excess of twenty million dollars a year."

SCOUT TROOP "MELTING POT"

In July about 2000 of the San Francisco boys representing Mexico, Langley, Greece, Lithuania, Russia, Germany, Italy, Holland, France, England, Scotland and America. The boys were either born in one of the 15 countries or their parents are natives of one of them. United States Commissioner of Naturalization Raymond P. Otter says: "They receive forms and maintain the all-American 'melting pot' against the youth of our country."

SCOUTS TO RID AIRMEN

But just good "birds" are now to include the aerial world. A special course of instruction for the scouts teaching them how to be of service to one of airplane sections and how to give the pilots the aid they need under consideration. The national scout organization has accepted in principle an offer from the National Aeronautics Association, the Post Office and War Navy departments, regarding the establishment of scouting training camps.

TREND OF SENTIMENT TOWARD LIGHT CAR

How rapidly the trend of sentiment is swinging toward the sub-400 lighter motor car equipment, in order to more satisfactorily meet present day traffic conditions, is emphasized in the tremendous increase in sales of the Ford Motor company for the first three quarters of the present year. An analysis of these sales shows that the sentiment is not alone among passenger car buyers but extends to commercial car purchasers who are finding that the smaller motor horsepower unit effects more efficient, speedy and economical delivery service. Sales of Ford cars and trucks in the United States for the first nine months of the year totaled 134,021, it is just announced. This is an increase of 66,413 over the same months of 1922. In September alone, 14,167 Ford cars and trucks were delivered at retail, a gain of 35,029 over September last year, which had sales for the month were 15,947 or 4500 more than in the same month a year ago—Adv.

HIGH TAXES AND RADICALISM

Why is it that high taxes seem to be an inevitable result of radical rule in the North Dakota road to plunge into state socialism, the taxes immediately went up and soon the state was groaning under its rate it had never known before.

Last year a governor of Oklahoma, elected by a combination of socialists and non-partisan farmers, promised good times for the poor people, especially the down-trodden farmers of that state.

When the news comes out from Oklahoma City that the state will not only talk but will in its history limit its mill. The state board of equalization has announced that this will not be enough to keep the state on a cash paying basis, according to Fred Thomas, state road building inspector.

The radicals have had plenty of opportunity to demonstrate what they could do in line of government. The result is that when the radicals get into the people get it in the neck.

PEDESTRIANS SHOULD ALWAYS FEAR TRAFFIC

If pedestrians won't carry full blame for the traffic in this city in the correct side of the highway at night! A number of complaints have been received by the city of Southern California from motorists who say that pedestrians at night are the cause of many near-accidents because of their carelessness.

It is pointed out that the majority of people who walk along the highway at night are on the back side of the road, proceeding in the same direction as the motor cars. In such cases, they walk with their backs to approaching auto.

It is better, says the club safety bureau, for pedestrians to proceed along the highways against the flow of traffic. In this way, the club safety bureau can see all cars approaching him and avoid accidents.

This problem in Southern California is more or less a reform one. Pedestrians are urged to proceed along the highways against the flow of traffic. In this way, the club safety bureau can see all cars approaching him and avoid accidents.

Several facilities have been reported to be in use. In this way, the club safety bureau can see all cars approaching him and avoid accidents.

GLENDALE SEWER WILL PROVIDE FLYING OUTLET

The Glendale sewer contract passed the city council Wednesday and was signed by Boyle Westman, the council president, as acting mayor.

By this Glendale may join its sewer system with that of the city of Los Angeles. The sewer will be used to carry off the sewage from the city of Glendale.

Headquarters for Southern California

Whole foods of automobiles, as thick as coal used to be in California, are being turned over the transcontinental highways this month.

GRAMMAR SCHOOL PUPILS DESCRIBED

The Gazette prints below three short descriptions written by pupils of the Owensmouth elementary school. They are published because of their probable interest to the patrons of the school:

The Trail of '49

The horse loaded down on the trail of Fort-y-nine. The oxen's feed and the wagon wheels, and heavily into the soil making deep ruts and gaps.

The trail went on and on, over prairies, through rivers, up hills, and over mountains.

The moon lit up a beautiful light path that wound around and over a little bridge which spanned the water rippling under it. A weary traveler stood and rested on its bank.

On wandered the little path to a bed of flowers. Mother Nature had made a beautiful garden, among which were rabbits played and hid-by Georgiant Thompson, seventh grade.

The Path

Silvery was the atmosphere at the pretty moon floated over a beautiful path which wound around the grassy hill. Tall trees, and the moon was everywhere and added to each other. Everything was calm and happy.

Henry Bohlin, Hans Barbara's largest property owner, died at his Montecito home of a heart attack, said Leo Nelson, trustee of National City and a cousin of President Arthur, died at the home of his son Henry at Pasadena.

The Motion Line, Matt bearing the San Francisco trust excursion, sailed for Honolulu, Oct. 17, with 199 deck passengers.

An important Alghany mining deal has been the buying of mineral properties with plans for reopening of large shafts.

The \$11,000 diamond bracelet from the mine of Mrs. Hilda Bohn was reported in the Del Monte police.

Chief Sander, paroled from San Quentin and arrested at San Bernardino, confessed to murdering Sgt. Bill Lake police officer, Oct. 14.

Edward Akers of Yuma was drowned in a public water when his car was crowded on the highway and overturned near the intersection. Development is to start at once on the wide and handsome Flat mine, Grand Valley, the Gold Valley Mining company.

Sacramento police records disclosed a greater number of arrests from drunkards during September than for any month since the advent of Prohibition.

The Midway Norwalk has brought in 1,100 tons of coal, 1,000-barrel lots daily, at a cost of \$1.50 per ton.

Mrs. Jennie Hawkins, one of the few remaining Hawaiians who settled on the lower Kaimali in Hilo, died recently at Kaimali.

Members of San Francisco's famous Black Cat cafe, a palmy day Bohemian resort, were sold at auction recently to the city of San Francisco.

Black cat members were paraded to old-time habitats. The City Government League has endorsed a petition for the Sacramento election. Candidates were selected from the twenty-three applicants who won the city council.

The 1923 crop of peaches and apples will be marketed in two pools. Fruit offered to the grocery commission on or before Oct. 31 will go into the first pool; late deliveries will be for the second.

Organized for the anniversary of the California League of Free and Accepted Masons at San Francisco voted to recognize grand lodge and set up a lodge in the city of Los Angeles.

Mr. and Mrs. William Klavner of the Pacific Coast are expected to get married Wednesday, Oct. 17, at their San Francisco country home. They were married at Stock in 1917 and have resided continuously in that county.

The Mount Shasta Power Corporation is made defendant in a suit by the state of California, charging the intake of Pit No. 1, a logging injury from diversion of water from the river to the company's power house.

Water has entered four wells in the area of the Torrance oil field and operations are being held up to determine the cause. Chancellor Caudill thinks the wells went too far below the water and struck underground.

Campano enthusiasm at Stanford is being rekindled by the newly organized basketball team. Former intercollegiate quarter mile runner, Fred King, has been added to the varsity squad.

W. E. Collins, University of California graduate, has received \$100 for a prize-winning scenario from the National Film Board of Canada and the university received a prize of \$100 for the same scenario.

The Los Angeles police, answering 15-year-old Joseph Wood's phone call for help, found the boy's mother dead from a self-inflicted bullet and the boy suffering from a slight wound which he had inflicted and done before turning the gun on herself.

Charles Yarnall, 70-year-old San Francisco veteran, was shot and killed when he stepped into the elevator shaft. It is believed that the cog was at the first floor where he had been standing and had moved the cog.

M. S. McHugh, secretary and superintendent on the university, may be maintaining a \$1,000 grant and making the checks himself. Officers were unable to fix the exact amount of the check because of the number of men employed.

Charles Yarnall, 70-year-old San Francisco veteran, was shot and killed when he stepped into the elevator shaft. It is believed that the cog was at the first floor where he had been standing and had moved the cog.

M. S. McHugh, secretary and superintendent on the university, may be maintaining a \$1,000 grant and making the checks himself. Officers were unable to fix the exact amount of the check because of the number of men employed.

Does that corn bother you? "Corn" is a new word for the 1920s. Guaranteed. Bestheimer's Drug Store
